PSEG	Thinh Pham

Meeting Summary

Agenda

- Announcements
- Review changes to the 2024 Annual Report
- Discuss planning for the Winter Stakeholder Webinar
- Other Business

Discussion

Announcements

- None

Review changes to the 2024 Annual Report

- The ATWG discussed a potential addition of an energy storage resource potential study in the Annual Report for plans beyond 2024. The team discussed the impact of this study on the CGPP, how funding would fit into the ATWG budget, and any next steps.

- An ATWG member noted that this would supplement the work that NYSERDA has done. A resource potential study focuses on the ability to site resources and provides flexibility for analysis. There is currently a resource potential tool for renewables, but not for storage.
- Note that a more robust capacity model would support energy storage siting in different areas in New York.
 - BNL expressed the ability to provide technical support in this process.
- Concentric to add the energy storage resource potential study recommendation from along with any comments from the Executive Review for the ATWG to provide feedback.

Discuss planning for the Winter Stakeholder Webinar

- The Winter Stakeholder Webinar will focus on highlights from the 2024 Annual Report, which Concentric will develop slides for. The ATWG discussed the date for the Webinar.
 - The intent of the Webinar is to review the ATWG Annual Report and consider the timing of a Call for Concept Papers in 2025.

Other Business

- The ATWG Chair has transitioned from King Look to Sergio Rodriguez.
