

Electric Vehicle Charging Equipment – Eligible List

The EVSE listed below are eligible to be installed as a part of the EV Make Ready Programs deployed by the Joint Utilities of New York. Please refer to the Joint Utilities website (jointutilitiesofny.org/ev/make-ready) for more information or to have additional equipment added to the list.

ISO 15118 hardware requirement refers to a charger’s hardware capable of implementing both ISO 15118-2 and ISO 15118-20.

While not a requirement of the Joint Utilities, effective June 26, 2023, all Level 2 EVSE sold in New York must be certified with ENERGY STAR V1.0 (April 2017) or V1.2 energy efficiency standards, per the Advanced Building Codes, Appliance and Equipment Efficiency Standards Act of 2022. Please refer to the [New York State Appliance and Equipment Efficiency Standards](#) for more information on the current standards.

The Joint Utilities do not make any recommendations or representations regarding any suppliers or product approved for use in EV incentive programs. The Joint Utilities makes no representation regarding any suppliers’ or products’ quality, workmanship or safety and is not liable for the quality or safety of such products.

Please note that # indicates a model family. Models within a family that appears on this list are eligible.
