

Electric Vehicle Charging Equipment – Eligible List

The EVSE listed below are eligible to be installed as a part of the EV Make Ready Programs deployed by the Joint Utilities of New York. Please refer to the Joint Utilities website (jointutilitiesofny.org/ev/make-ready) for more information or to have additional equipment added to the list.

The list contains all equipment that meets the current requirements as of the date of publication. Additional requirements will be phased in on the dates listed below.

ISO 15118-3 Compliant status refers to a charger's hardware conformance to ISO 15118-3 and its capability of enabling either ISO 15118-2 or ISO 15118-20.

- **This requirement is not applicable to Level 2 (AC) chargers committed before June 1, 2025.**
- **This requirement is not applicable to DCFC (DC) chargers committed before December 16, 2023.**

ISO 15118-2 or -20 Compliant status refers to a charger's software conformance to ISO 15118-2 or ISO 15118-20.

- **This requirement is not applicable to Level 2 (AC) chargers committed before June 1, 2025.**
- **This requirement is not applicable to DCFC (DC) chargers committed before December 16, 2023.**
- **DCFC (DC) chargers committed between December 16, 2023 and November 15, 2024 are required to comply with this standard by November 16, 2024.**

OCPP 2.0.1 Hardware Compliant status refers to a charger's hardware conformance to OCPP 2.0.1 or later.

- **This requirement is not applicable to Level 2 (AC) chargers committed before June 1, 2025.**
- **This requirement is not applicable to DCFC (DC) chargers committed before November 16, 2024.**

Starting March 1, 2025 for DCFC chargers and June 1, 2025 for L2 chargers, equipment will be required to be listed on the [EPRI Vetted Product List \(VPL\)](#) to be eligible for the Make-Ready Program. Chargers on this Eligible Equipment List that have "No" in the "On EPRI List" column will not be eligible after these dates unless the OEM applies to have them vetted by EPRI.

While not a requirement of the Joint Utilities, effective June 26, 2023, all EVSE sold in New York must be certified with ENERGY STAR V1.0 (April 2017) or V1.2 energy efficiency standards, per the Advanced Building Codes, Appliance and Equipment Efficiency Standards Act of 2022. Please refer to the [New York State Appliance and Equipment Efficiency Standards](#) for more information on the current standards.

The Joint Utilities do not make any recommendations or representations regarding any suppliers or product approved for use in EV incentive programs. The Joint Utilities makes no representation regarding any suppliers' or products' quality, workmanship or safety and is not liable for the quality or safety of such products.

Last updated on November 8, 2024.

JOINT UTILITIES OF NEW YORK

Please note that # indicates a model family. Models within a family that appears on this list are eligible.

*OEM certified a previous version of the hardware requirement which implies conformance with the current requirement for DCFs, but has not yet explicitly certified conformance with ISO 15118-3.
